

ML_HSK Grab Rail Hand Shower Kit

Note

This product is to be installed by suitably qualified persons, in a fit-for-purpose application, to suitable materials, using suitable fixings, and complying with any relevant codes.

Dimensions

- **Hose:** 2m

Hardware Provided

- 1x Thread Tape Roll

Before Installation

- Inspect the product. If there is any damage or missing parts, do not install the product and contact your place of purchase.
- Ensure the water pressure is between 150-350kPa.

Installation Instructions

Placement may be subject to regulations/codes and architectural drawings. Correct positioning is the responsibility of the installer

1. Fit the cover plate around the wall elbow and, using thread tape, screw it onto the threaded outlet it is to be installed on, ensuring it is tight, flush with the wall, and faces downwards.
2. Rotate the dial on the side of the slider counterclockwise to remove it, fit the two halves of the slider over the grab rail it is to be installed on and turn the dial clockwise to tighten.
3. Screw the end of the hose with the nut to the wall elbow, ensuring the washer is inserted.
4. Screw the other end of the hose to the shower handpiece, ensuring the flow controller is inserted.
5. Hang the shower handpiece in the bracket of the slider.
6. Test that all three shower functions work as expected by pressing the button on the handpiece and check for any leaks.

This product is AS 1428.1 compliant (accessible compliant) when installed in accordance with the guidelines.

Technical recommendations and installation advice from Metlam Australia Pty Ltd are general in nature and provided in good faith without warranty. Metlam disclaims all liability for errors, omissions, or damage resulting from improper installation or maintenance. All products must be installed by qualified tradespeople and maintained by competent personnel. It is the installer's responsibility to conduct thorough pre-installation assessments; Metlam Australia will not enter into post-installation disputes regarding positioning, functionality, or external factors affecting performance.
