

Refilling Folded Paper Towel

Follow these seven steps to ensure your Metlam Australia paper towel dispenser functions correctly and efficiently.

1. Open the Dispenser

Use the key provided to unlock the dispenser and open it to access the interior.

2. Check Capacity

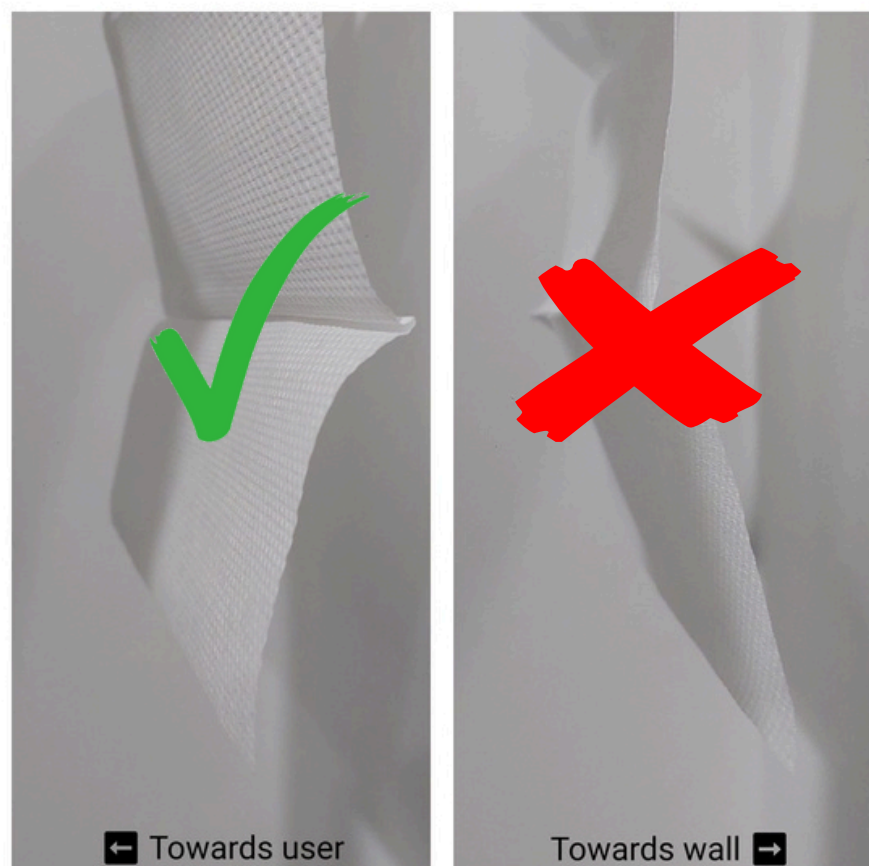

Do not overfill the dispenser. Overfilling can cause jamming and tearing, resulting in wasted product.

3. Choose the Correct Paper Towel

Select a suitable size and style of paper towel for the dispenser. For optimal performance, use Metlam Australia's recommended paper towels, ML PT SLIM and ML PT ULTRASLIM.

4. Load Towels the Right Way Up

Locate the end of one side of the towel stack. Ensure that this edge faces out of the dispenser towards the user, as per the diagram below:

5. Align the Towels

Ensure the towels sit flat and even inside the unit. Avoid bending or crumpling the towel stack to prevent jamming.

6. Close and Lock the Dispenser

Close and lock the dispenser to secure it.

7. Test Pull

Gently pull the first towel to confirm smooth dispensing.
